

A scenic view of Lake Tahoe. In the foreground, there are pine trees and rocky shorelines. The water is a deep blue, with some kayakers visible in the middle ground. In the background, there are snow-capped mountains under a clear blue sky.

Performance-Driven Stormwater Programs

Lake Tahoe Example
Chad Praul, Peter Kraatz & Jeremy Sokulsky

APPROACH

URBAN STORMWATER CREDITING PROCESS & TOOLS

Set Expectations

Once per lifetime of infrastructure

Register

Inspect Actual Conditions

Annually

KEY PRINCIPLES

Share the Theory of Change

Select Metrics & Credit
Success

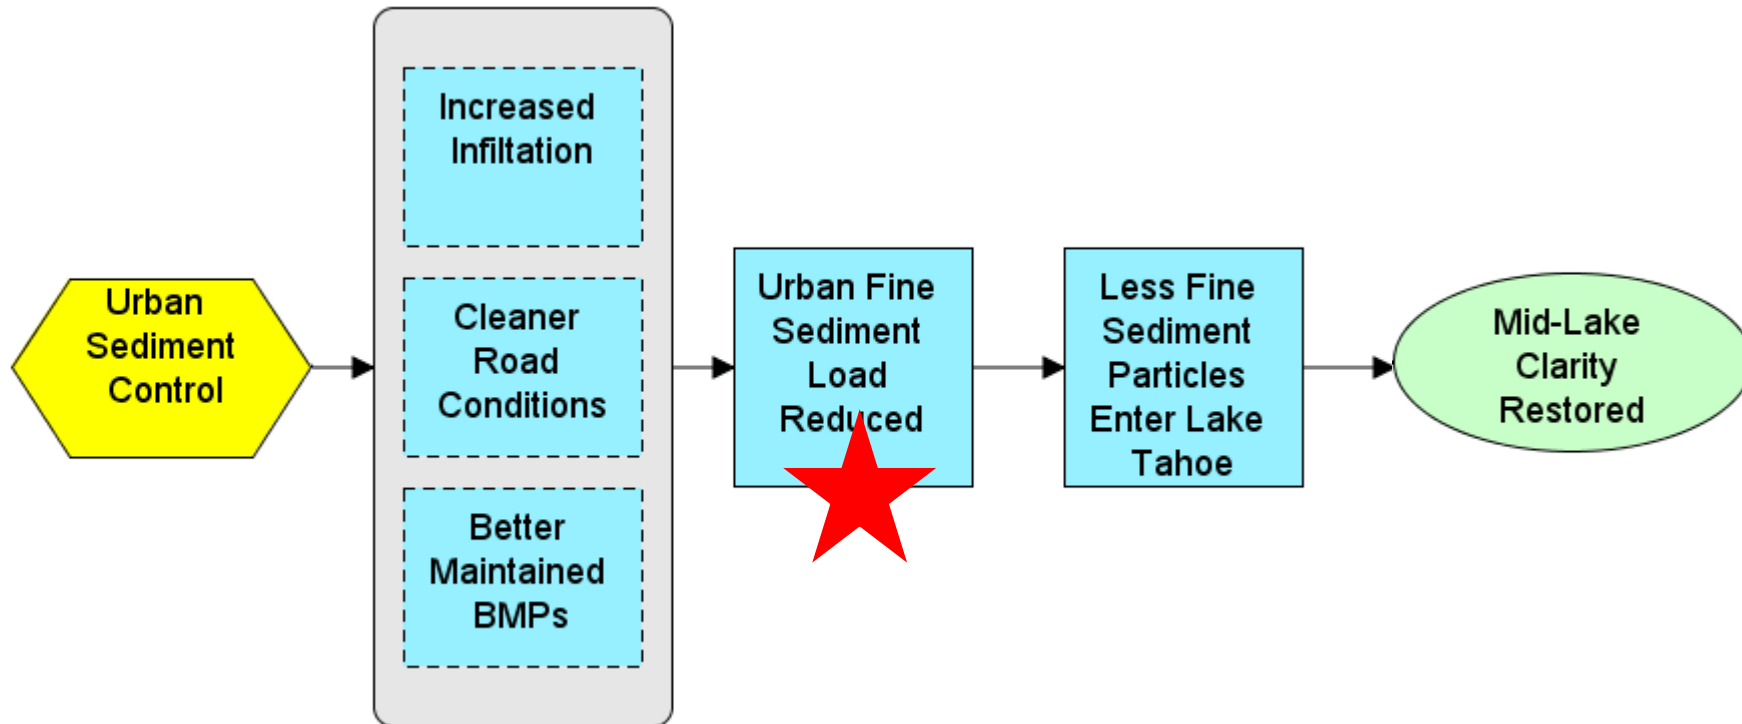

Structure Reporting &
Adaptation

Understand the “Why”

SHARE THEORY OF CHANGE

Motivate Effective Action

Select Metrics & Credit Success

- Focus on metrics with quantity & quality
- Aspirational but achievable targets motivate action
- Interim milestones address long timeframe issues

Placer County Milestones

NON-MS4 SOURCE TRACKING METRICS

Miles of Roads Treated

Lake Clarity Credits

Miles of Roads Inspected & Maintained

Miles of Roads Created

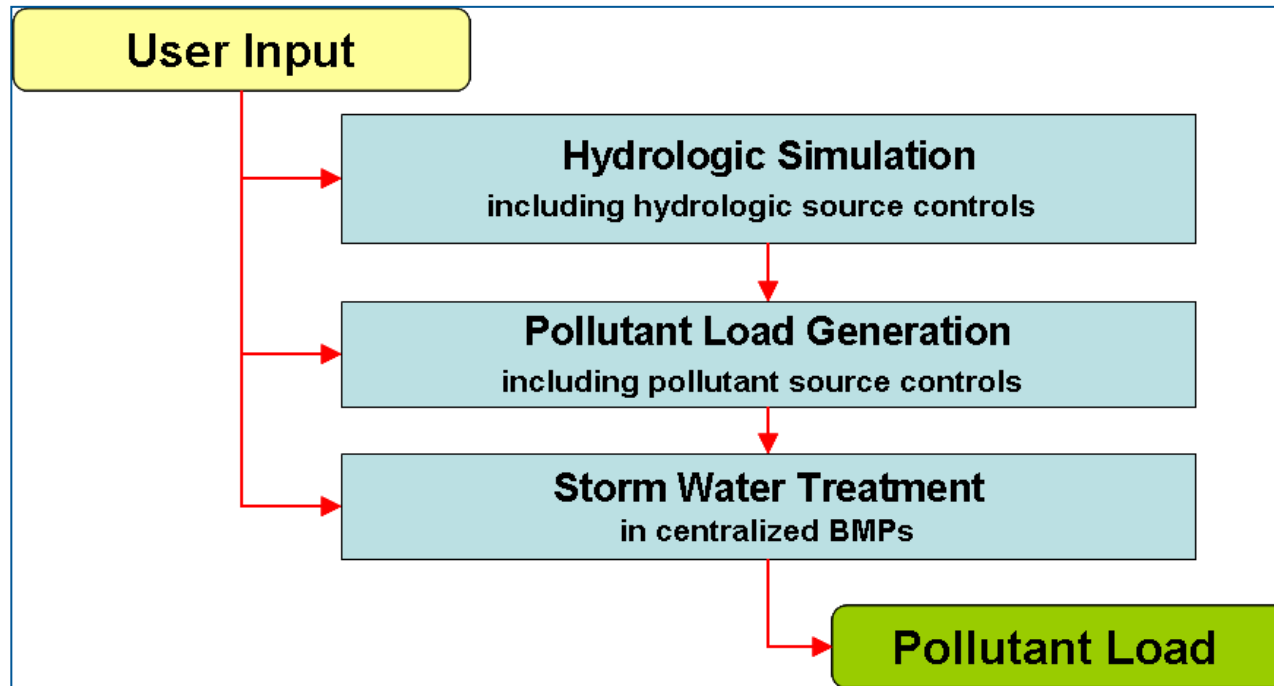

Acres of Disturbed Area Restored or Enhanced

Parcels With Stormwater Retrofits

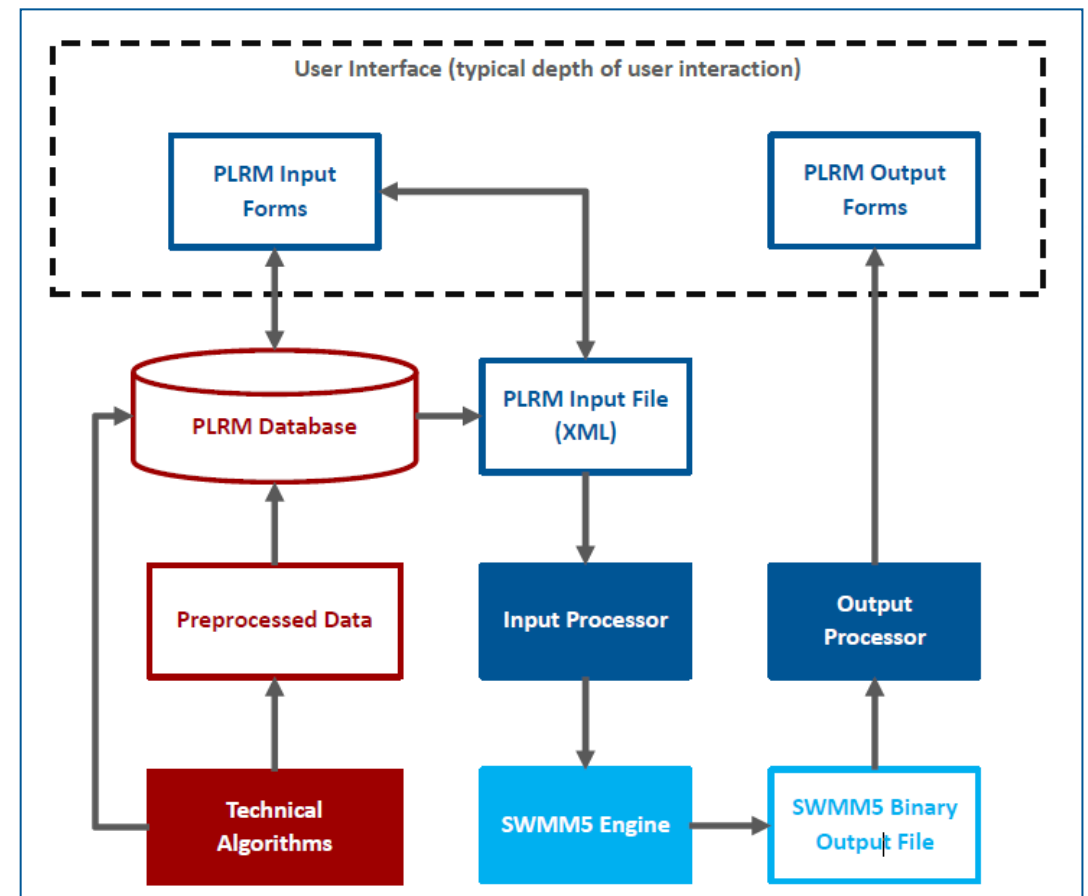

Linear Feet of Stream Channel Restored or Enhanced

POLLUTANT LOAD REDUCTION MODEL (PLRM)

MODEL STAGES

MODEL STRUCTURE

WHAT IS BEING MODELED?

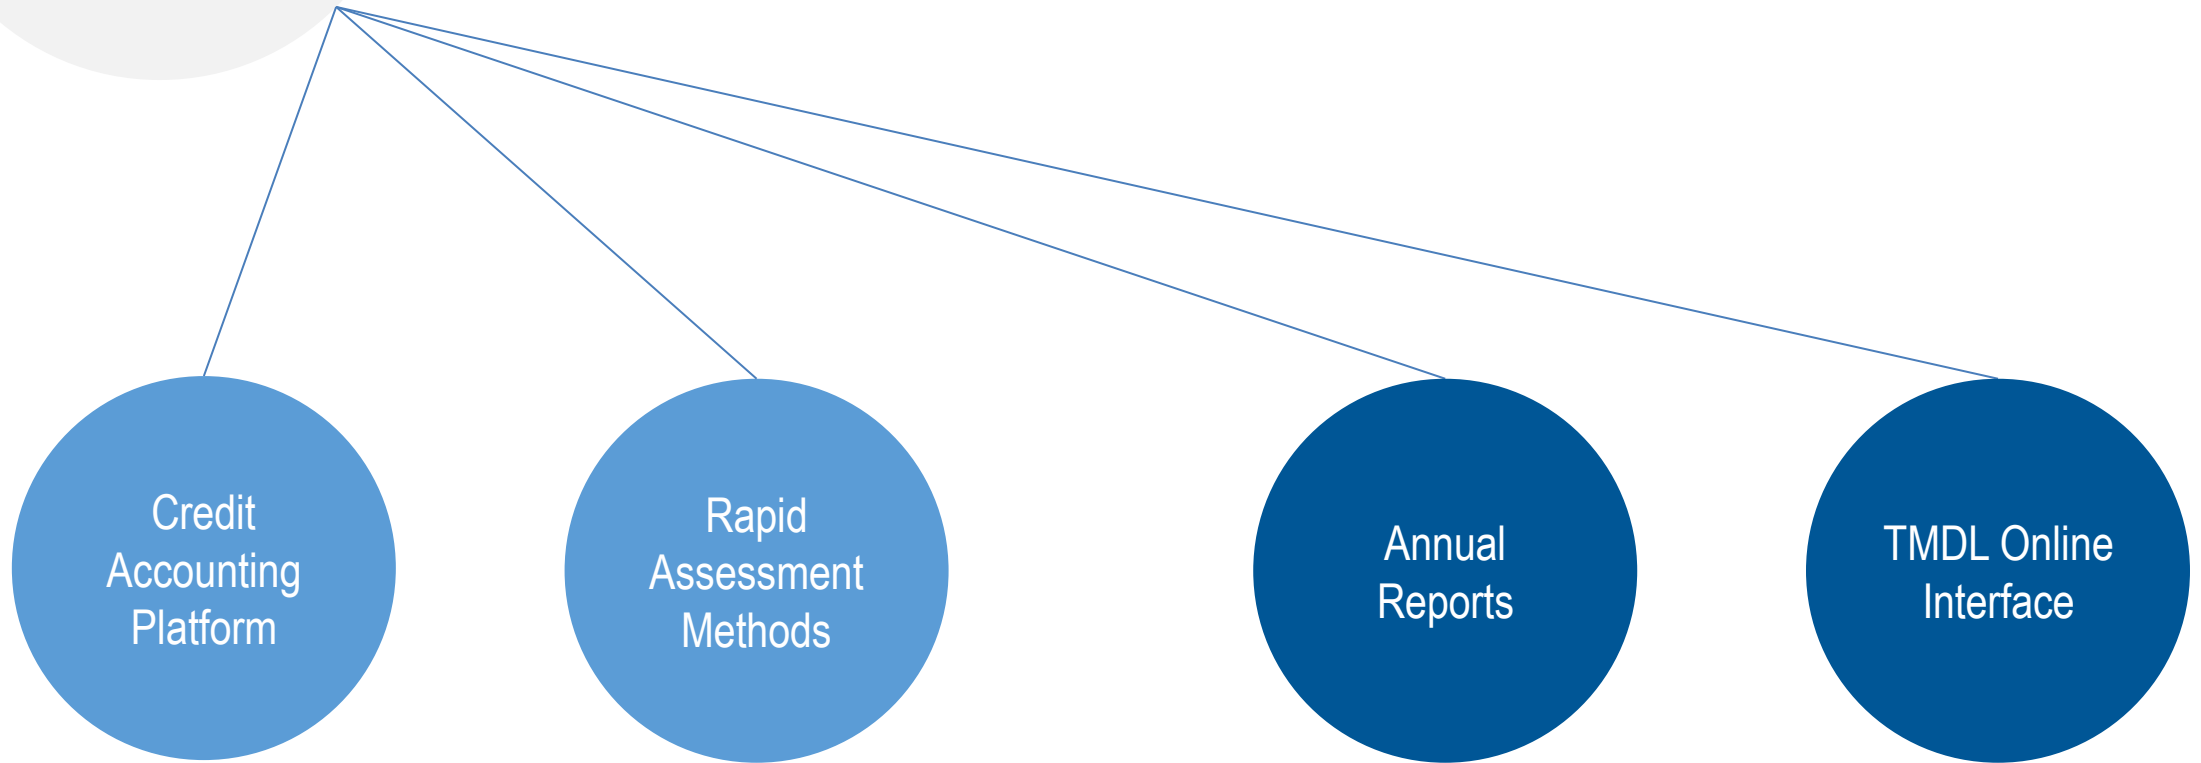

FOR URBAN RUNOFF
IN KINGS BEACH,
PLACER COUNTY

EXAMPLE — TREATMENT BMP

STRUCTURE REPORTING & ADAPTATION

CREDIT ACCOUNTING PLATFORM

<http://www.tahoeroadram.com/cap/Login/login.php>

INVENTORY & REGISTER

Complete inventory, estimate load reduction, and submit registration.

INSPECT

Conduct annual maintenance and condition inspections of pollutant control strategies.

DECLARE

Declare annual credits based on inspection results.

REPORT

View annual report of credit progress for jurisdiction.

Rapid Assessment Methods (RAMs)

Tahoe Road RAM www.tahoerodram.com

Tahoe BMP RAM www.tahoebmpram.com

ANNUAL REPORT DOCUMENT

What do we want?

Restore lake clarity
(Beneficial Use: non-contact recreation)

What are we doing about it?

Urban sediment source control

How are we doing?

Clarity loss is slowing

Performance Metric

Sediment load reduced

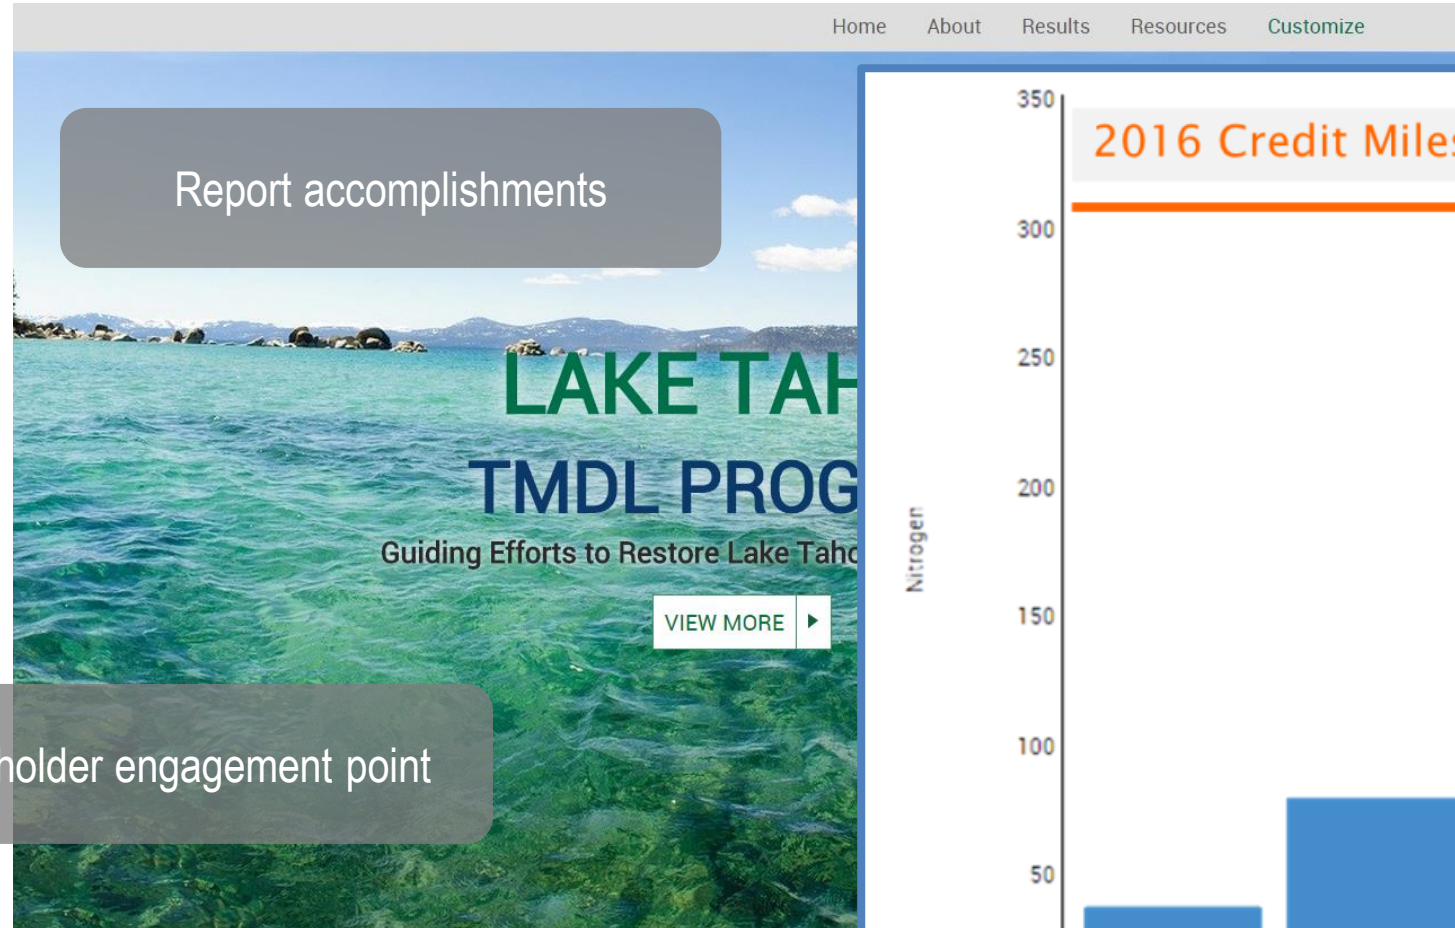

Outcome Metric

Secchi Depth

TMDL Online Interface

Lake Tahoe TMDL Program: The TMDL Online Interface

The Lake Tahoe Total Maximum Daily Load (TMDL) is a science-based plan to restore Lake Tahoe's famous clarity. One of the most robust efforts of its kind, the Lake Tahoe TMDL was initiated to understand the causes of clarity loss, determine how much pollution needs to be reduced and develop

- 
- Link modeling assumptions to observable metrics
 - Respect & focus practitioner judgement
 - Metrics need quantity and quality aspects
